

# Digital Forensic Student Conference

@ Glasgow Caledonian University

Wednesday 26 March 2014

The technological landscape continues to rapidly evolve creating challenges within the discipline of digital forensics. This spring to address these challenges Glasgow Caledonian University is aiming to bring the wider community together to share and disseminate understanding and advance practise in all aspects associated with current developments in digital forensics to enlighten and inspire the next generation of forensic professionals.

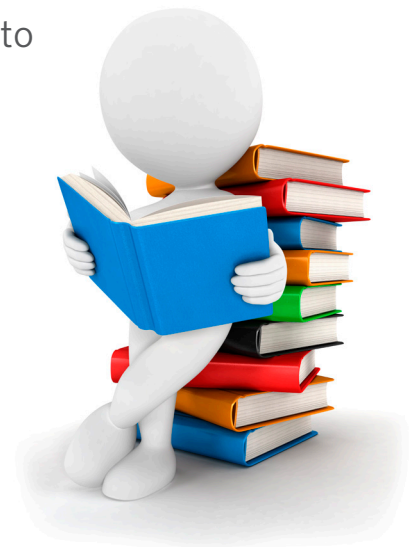

The conference also aims to enable academia, law enforcement agencies, forensic practitioners, and industrial professionals to come together to increase the breadth and depth of forensic knowledge and explore different ways to overcome the challenges that we face.
